VEEAM DATA PLATFORM — BACKUP & RECOVERY

Veeam Backup & Replication

Own, control, back up and recover all your data, anywhere in the hybrid cloud

Challenge

Many enterprise IT teams are not confident in their data protection strategies due to legacy backup inefficiency, unreliable recoveries and complex management across their entire datacenter.

Veeam® Backup & Replication™ is the industry-leading backup, recovery and data security solution for all your workloads, both on-premises and in the cloud. As the foundational component of Veeam Data Platform, Veeam Backup & Replication delivers secure, powerful and reliable data protection. Eliminate downtime with Instant Recovery and stay safe from cyberthreats with native immutability and tested backups, all from a software-defined, hardware-agnostic solution.

- Meet recovery objectives with confidence
- Reduce risk with comprehensive data security
- Accelerate your move to the hybrid cloud

Key capabilities

Broad protection

Automate comprehensive backup across cloud, virtual, physical and NAS environments.

Freedom of choice

100% software-defined and hardware-agnostic solutions for ultimate flexibility.

Reliable recovery

Automated backup and replica testing ensures recovery in any disaster.

Instant Recovery

Achieve your service level agreements (SLAs) with reliable restores from the pioneer of instant recovery.

Automatic backup scans

Create malware-free backups thanks to automatic scans with trusted malware detection.

Scale out with ease

Reduce costs by combining any storage together to create a scalable backup repository.

Cloud-integrated agents

Centralized AWS-, Microsoft-Azure- and Google-Cloud backup and recovery.

Restore anywhere

Recover across multiple clouds and platforms in a portable data format.

Cloud DR

Get two-step recovery to any cloud for agile disaster recovery (DR), dev/test and analytics.

Data stays safe

End-to-end immutability for your backups everywhere, from the datacenter to the cloud.
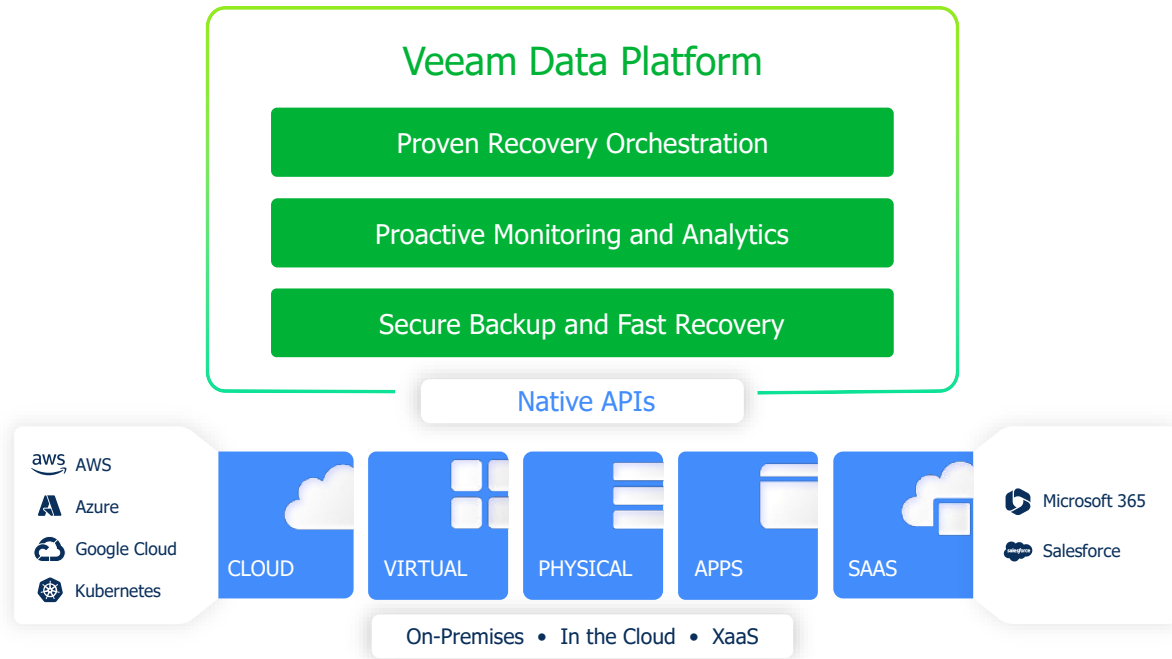

Cloud security

Use AWS KMS, Azure Key Vault, immutability and more to keep ransomware out.

Prevent re-infection

Automated verification exposes undetected malware before recovery.
